The above lands will be offered for sale subject to a reserve bid, and subject to the reservations contained in the existing certificates of title. Terms, cash.

Redemption may be effected by payment of the full amount of arrears of taxes and costs at any time prior to the sale.

Dated at Chinook, Alberta, this 9th day of September, 1932.

R. B. LANGLEY,  
Secretary-Treasurer.

## World's News Briefly Chronicled

### Britain Urges Armaments Cut.

(By Canadian Press Cable in Calgary Herald.)  
London, Nov. 17.—Great Britain wants reduction of armaments by land, sea and air.  
Sir John Simon, secretary for foreign affairs, by a declaration before the bureau of the disarmament conference at Geneva, and the British government in the form of a white paper tabled in the house of commons today, laid down the main lines of British disarmament policy.

Britain makes new and concrete proposals to meet the growing menace of air bombardment. "There is no aspect of international disarmament," says the British declaration "more vitally urgent than adoption without delay of the most effective measures to protect civilian populations from the fearful horrors of bombardment from the air, combined with effective control of civil aviation."

After observing the Royal Air Force stands only fifth in size among the air forces of the world today, the British government proposes as practical and immediate measures of disarmament:

1. Immediate reduction of the air forces of the leading powers to the level of those of the United Kingdom.
2. A cut of 33 1/3 per cent. all round in the air forces of the world.
3. Limitation of the unladen weight of military aircraft to the lowest weight on which general agreement can be found.

British proposals for qualitative disarmament by land and sea are as follows, qualitative disarmament calling for reduction in specific warship tonnage and gun caliber.

1. Substantial reduction in capital ships (at present maximum tonnage 35,000, maximum gun calibre 16 inches).
2. Cruisers should be limited to 7,000 tons mounting 6 inch guns (at present maximum cruiser tonnage is 10,000 with 8-inch guns).
3. Abolition of the submarine.

### Land armaments:

1. As a first stage, abolition of all tanks above a given weight.
2. Calibre of mobile land guns to be limited to 4.5 inches.

### Anti-Dry Law Drive In U.S. Gains Impetus.

(By Associated Press in Calgary Herald.)

Wash., Nov. 18.—The drive for a change in United States liquor laws gained impetus Friday from an announcement by Senator Arthur H. Vandenberg, Michigan Republican, that he favors immediate submission of a prohibition repeal amendment and liberalization of the Volstead law.

Vandenberg's announcement came as anti-prohibitionists in the house of representatives were seeking to have the ways and means committee draft a beer bill in time for presentation when congress convenes.

### Von Papen and Reich Cabinet Resigns.

(By Associated Press in Calgary Herald.)

Berlin, Nov. 17.—The entire German cabinet resigned Thursday and their resignation was accepted by President Von Hindenburg.

The resignation was not unexpected.

Opposition by all but two small parties in the Reichstag dictated the retirement of this government.

Adolf Hitler's National Socialists, the strongest party in the opposition, never have supported Von Papen's administration.

The Centrists, the Bavarians and all the others except the Nationalists and the Populists have announced their opposition since the last Reichstag election. That left the chancellor with only 10 per cent of the new Reichstag.

### Alberta Wins in Holstein and Other Classes.

(Special to the Calgary Herald.)

Toronto, Nov. 17.—Dr. C. E. Hays, of Calgary, and the C.P.R. Strathmore farm appear prominently in the Holstein prize lists at the Toronto Royal as the result of judging concluded Thursday morning, winning three firsts in Holstein bull classes against keen eastern competition.

Dr. Hays won first in the two year-olds with Hays Johann De Kol and the C.P.R. was third with Strathmore C. Kuba Fairchild. In the senior calf classes the C.P.R. won first with its bull Strathmore McKinley Senator, and Hays got second with Hays Sensation. In the yearling class C.P.R. got first with Strathmore McKinley Senator, and fifth on Strathmore Koba Jasmine. In the junior calf bulls second place went to Hays on Hays Fritz Dekol and eighth to the C.P.R. farm on Strathmore McKinley Retainer.

In the Hampshire sheep classes C.P.R. Milley farm won first in the aged ram class.

Toronto, Nov. 21.—Dominion, a dual purpose Shorthorn year-old bull, bred by the Alberta department of agriculture at Vermilion, after heading his class went on and won the junior championship, and then the reserve grand championship.

In the straight beef Shorthorns' breeding classes there were a couple of good wins for Alberta in summer yearlings. The University of Alberta had first on Golden Key U.A., and W. L. Robinson, Vermilion, was second in the same class on Golden Hero U.A.

In the Clydesdale judging this morning R. A. Allan, of Dalroy, had third in two-year-old stallions on Gallant Footprint.

Toronto, Nov. 22.—In Shorthorn J. L. Walters, of Clive, with the two year-old heifer Homelands Princess won first in a big class and then went on and captured the senior championship and reserve grand championship. The Prince of Wales' summer yearling heifer, Princeton Lucile, was first in the class and was given the reserve junior ribbon.

Ranch came forth in the summer yearling class. In junior calf Shorthorn heifers the University of Alberta had the red ribbon on Golden Drop U. A. In two year-old dual purpose Shorthorn heifers the Alberta department of Agriculture, Edmonton, secured third place with Cambus Dairy-meade jrd.

### Municipalities Vote Down Enlarged Areas.

(From the Calgary Herald.)

Fear of the invasion of Municipal districts' rights by the provincial government and the possible saddling of poor areas upon districts better organized and more prosperous, appeared to be the main objections in a concerted attack upon the government's proposed larger municipality scheme, presented to the convention of the Alberta Association of Municipal Districts, Friday.

At the conclusion of the morning session the delegates overwhelmingly turned down the proposal.

Following an explanation of the scheme by Robert English, deputy minister of municipal affairs, speaker after speaker denounced any change from the present system.

Alberta's provincial financing for the fiscal year ending March 31st, 1932, shows a deficit of \$5,153,050.00, as against a deficit of \$2,306,581.00 for the previous fiscal year.

### Senator Murdoch Opposes Join Management of Rail Systems

(By Canadian Press in Calgary Herald.)

Ottawa, Nov. 18. An emphatic appeal by Hon. Raoul Dandurand, veteran Liberal senator, that the two great railways of Canada be placed under a joint management for a period of 15 years, was made before the senate committee considering the railway bill Friday morning.

Senator James Murdoch, while admitting that such a move would undoubtedly bring great economy, declared it would mean a very uncertain fate for the government-owned system, and he strongly opposed it as being against the will of the people.

### \$10,000,000.00 Direct Gov. Aid for Australian Farmers.

(C. P. in Calgary Herald.)

Canberra, Australia, Nov. 18: The Commonwealth government today amended terms of its proposed grant to wheat farmers and decided to set aside about ten million dollars for direct assistance to growers in financial difficulties.

At the same time it announced that about \$625,000 would be appropriated to help primary producers other than wheat growers to purchase superphosphates to fertilize their farms.

## The Pendulum Swings.

Conditions through which all peoples and nations are presently passing are a testing time of individual character, of community thought and activity, of national stability. Present conditions constitute a yardstick by which to measure one's real outlook on life and a means whereby to gauge one's inner conception of what truly constitutes life. Is life solely a material existence in which things material are of first importance? Or is life something far greater and nobler, with material things merely necessary adjuncts to our physical well-being in order that the better, finer things of life may be developed and enjoyed?

For the time being the world lies wounded and bleeding at the bottom of a chasm of financial and economic depression. All mankind is suffering. And we, therefore, to turn and reach each other like animals; allow the purely destructive elements in our natures to have full sway over us, and lash out blindly at all those things and institutions upon which we place the blame for our troubles; tear down what we ourselves, in our calmer, more thoughtful moments, and our predecessors throughout the ages of the past, have erected? And if we do so, can we complete the work of destruction, will we then be wiser, better equipped, more efficient for the work of reconstruction?

Three years ago the world was riding the crest of the wave of a so-called prosperity. Everybody was engaged in scaling the heights. Having reached the apex of its swing, the pendulum had, by the laws of nature, to swing back, and having swung so far to the right it had, of necessity, to swing just as far to the left. It took some years to reach the peak of 1929-29; it will take some years to again reach a normal, trustworthy level. It is not the pendulum itself that is wrong, but the human forces which carried it to one extreme but, having carried it there, are now powerless to prevent its backward swing.

In the almost universal madness of the Great War, the nations plunged up impossible huge mountains of debt. While war passions were still uppermost, and most countries lying prostrate, public opinion in the victor nations, looking about for means of recouping the losses forced upon them, dictated equally impossible peace terms. New nations were placed as an intense, unreasoning nationalism developed. The war pendulum swung to its extreme limit; the inevitable backward swing is causing almost as much suffering as the war itself.

In the so-called after-the-war reconstruction period the world was engaged in a few feverish years of great productive and industrial activity. There were legitimate war losses to make good, but the world did not stop there. People everywhere again carried the pendulum to one extreme. Eve, yoked ploughed into debt, buying right and left on credit, much of it on the installment plan of deferred payments. They kept on doing so until the limit, the saturation point of such buying was reached. The pendulum swung back, and having swung so far to the right it had, of necessity, to swing just as far to the left. It took some years to reach the peak of 1929-29; it will take some years to again reach a normal, trustworthy level. It is not the pendulum itself that is wrong, but the human forces which carried it to one extreme but, having carried it there, are now powerless to prevent its backward swing.

In their trouble and worry thousands of people are in no state of mind to calmly appraise the blame. They refuse to see that they are themselves in any sense responsible; they only did what everybody else was doing. So they say it is the "system" that is to blame; therefore, destroy the system and create a new one. The "system" requires change, reform, improvement. They demand a question about that, because people need to be saved from themselves, from their own impulses, from their own selfish desires. But people cannot be saved from their "mistakes," or prevented from making mistakes, unless they are to be treated and governed as immature children. And who are the ones to whom the responsibility of this disciplining humanity shall be given? Granted, the "system" calls for change—and, like everything else in this changing world, the "system" is changing, changing as a result of the experiences of the past and the present—but should it be destroyed and some entirely new and untold theories in government, in finance, in the whole complicated world of economics, including all production, distribution, exchange, whether within a given country or between the world, be replaced?

Would it be wise at this time, when so much confusion of thought prevails, when people everywhere are not capable of that clear, sane vision with which they are usually endowed, when because of their worries they are naturally inclined to strike out blindly, to destroy and abandon as so much junk all those policies and institutions which only four or five years ago they approved and supported? Because the pendulum, it is backward swing, is for the moment at the extreme, although it must, just as inevitably, begin to swing again to the right—is that any reason to attempt to tear it from its moorings and seek to establish some new order which would defy the laws of gravity and momentum?

When a person is worried or mad on the one hand, or unduly elated on the other hand, is the worst of all times for him to make important, far-reaching decisions that will affect his future career. When people were on the mountain top of so-called prosperity in 1929-29 they made decisions, mistaken decisions, for which they are now paying in bitterness and woe. To make other, and equally important decisions now when they are in the valley of depression would be equally unwise, equally fatal.

Let the pendulum swing back to normal. Not in the rafted air of the mountain-top, nor in the gloom of the valley—in neither of which can man permanently reside and survive—should our momentous decisions be made. Nature herself has shown us the way. From 40 below in winter to 100 in the shade in summer—but the major days of life are not spent in either one extreme or the other, nor do we when the mercury stands at 40 below plan our summer activities, or vice versa. We should plan for the average of our days, not following extremes, but seeking the normal, middle course, and striving to make that course a highway of life that is broad, and smooth, and pleasant to travel upon, a road to happiness and contentment, based upon a moderate and abiding degree of security, and time for the development and enjoyment of the finer things of life.

In a word, we should strive to so live as to enjoy, and that objective never has, and never can, be reached by hasty, ill-considered action, or through the mere seeking of material things to serve our selfish desires and ambitions.

## Car Thefts in Chicago

Exceeded New Ones Sold In Three Summer Months

Here's Chicago summed up in a few sentences. Automobile thefts in that city during the three summer months topped the number of cars sold in the metropolis during the same period.

Figures, released by the Chicago Automobile Trade Association, show that 10,199 autos were stolen, as compared to 9,068 cars purchased. Many of the stolen machines were recovered, but only after they had been stripped, the association report points out.

## Make X-Ray Photos Clearer

Peculiar Effect Of Sound Waves On Human Body

It has been found recently that it is possible to take clearer X-ray pictures of parts of the human body after these parts have been exposed to sound waves from a large loud speaker. The speaker unit emits a sound of constant pitch and of sufficient volume to create a perceptible vibration, says Popular Mechanics Magazine. X-ray photographs taken before and after such vibrations show the latter are much clearer.

## King George Loves Rents

The King of England has decided to cut rents. He will reduce by twenty per cent. the rents of land at Sandringham, used as allotments, thereby benefiting 60 workmen, who now will only have to pay 5s an acre.

In a reminiscent mood the other day, President Hoover recalled the fun he had as a boy sliding down hills on his tummy. So you can cross that off the list of ways to reduce.

Nearly all important buildings erected in Japan in the last few months are of reinforced concrete.

## Britain Must Play Safe

Cannot Afford To Reduce Armaments More Than Other Nations

Fifteen years ago one whole nation was singing the doctrine of hate. That hellish doctrine of theirs is likely to continue in that faith for a couple of generations longer unless a miracle is wrought. To match armament with armament has been the only safe way for England. Britain and her off-spring have done a nifty per cent. of the missionary work that has ever been done in the world, and printed and distributed nearly all the Bibles that are in use in the mission fields; surely it is the will of heaven that her statesmen should be permitted to preserve her life in the same human and diving way that it has been preserved for a thousand years and more.

## Builds Up Paying Business

Musicalian Who Lost Job Now Makes Lead Soldiers

Frank Beucha, a musician of Racine, Wisconsin, lost his job with the advent of the "talkies" and the depression, but he has built up a paying business making lead soldiers. Each soldier is hand-painted with the aid of a magnifying glass and all are gay and brighter than those turned out by regular manufacturers. He has cast and painted numerous armies and hopes to find a military market for his figures, which, he believes, can be used to illustrate soldiers in training.

## UNABLE TO KNEEL

Neuritis Hampered Her

In writing of the pain and inconvenience she suffered from neuritis this woman tells also how she rid herself of it.—  
"I have been using Kruschen Salts for neuritis, and it certainly has the most wonderful effect. My knees were very painful, and it became almost impossible to kneel. As I do all my own housework, you will appreciate what it means to me. Two months ago I began using Kruschen, and I certainly would not be without a bottle in the house for anything. I consider Kruschen is worth its weight in 22-carat gold."—C. M. W.

Neuritis, like rheumatism, lumbago, and sciatica, is caused by deposits of needle-pointed, flat-hard, uric acid crystals, which pierce the nerves and cause those stabbing pains. Kruschen breaks up these deposits of torturing crystals and converts them into a harmless solution, which is promptly removed through the natural channels of the kidneys. And Kruschen keeps the inside so regular—so free from fermenting waste matter—no such body poisons as uric acid ever get the chance to accumulate again.

## Find Ancient Skeleton

Remains Of Young French Soldier Who Died In 1653 Found In Quebec

A skeleton believed to be that of a young French soldier killed while defending the city against an Iroquois attack on August 23, 1653, has been unearthed by workmen excavating in the heart of Old Three Rivers in Quebec.

A brass platter, a leather-covered sash bearing the soldier's regiment number, a container made of bark and some small pieces of cloth were found near the bones.

To Asthma Sufferers, Dr. J. D. Kellogg's Asthma Remedy comes like a helping hand to a sinking swimmer. It gives new life and hope—something he has come to believe impossible. Its benefit is too evident to be questioned—it is the only remedy—its own best advertisement. If you suffer from asthma get this timely remedy and find help like thousands of others.

## France Building Rocket

A rocket costing \$2,000,000, is being constructed in France for interplanetary flight. This is not intended to be a mere projectile fired into the moon, but a vehicle to transport man there, equipped with everything modern science can think of to secure the safety of the passenger, and instruments to collect the invaluable data.

Jack: "Women don't interest me, I prefer the company of men."  
Jill: "Why don't you say you are broke and be done with it?"

## Well Children

"Occasionally I give each of my five children BABY'S OWN TABLETS—and I am sure that is why they never have any serious illness," writes Mrs. George Morley, Yarker, Ont. This sound advice is passed on to all Mothers. BABY'S OWN TABLETS can be given with complete safety to the youngest and most delicate child—see analyst's statement in each 25c package. Recommended by mothers for teething troubles, simple fevers, colds, digestive disorders, constipation, indigestion. Easy to take as candy.

Dr. Williams' BABY'S OWN TABLETS

## An Extended Honeymoon

Young German Couple To Visit Canada In Trip Around the World

A young couple who are now in the seventh year of their honeymoon journey around the world expect shortly to arrive in Canada for a leisurely trip across the Dominion.

They are Mr. Franz Hecker and his wife, Ernestine Hecker, who left Munich, Bavaria, on August 25, 1925, a few days after they were married, and have been travelling ever since by bicycle. They have just arrived in Tokyo, from Nagasaki and Kobe.

Their most pleasurable experiences throughout their whole trip so far, Mr. Hecker said, have been in India, but they are looking forward to enjoying a trip across Canada, and spoke enthusiastically of what they have heard of its wonderful scenery, at its best in summer for travellers, such as they are, they think. They also expect to tour parts of the United States.

Though their travels so far have been replete with encounters with brigands, wild animals, head-hunters, and obstinate officials, the young couple thirst for more adventure, and they are hoping to be able to obtain a sawtooth motorboat by which to cross the north Pacific, skirting Hokkaido, the Kuriles, the Aleutians, Alaska, and the west coast of Canada.

Falling a motorboat, they hope to get hold of a motorcycle, with which to see more of Japan, and then use it, after crossing the Pacific by steamer, to continue their rambles in North America.

After leaving Bavaria, the Heckers cycled through twenty-four countries before reaching Japan: Austria, Italy, France, Belgium, Spain, Portugal, Serbia, Rumania, Albania, Greece, Bulgaria, Turkey, Syria, Mesopotamia, Persia, Beluchistan, Burma, Siam, Federated Malay States, Java, Bali, Celebes, Philippines and China.

They learned six languages, Turkish, Arabic, Greek, Spanish, Italian and English while doing this, the latter during the two years they spent in India. They expect to be another two or three years on the road before they return home. Then they intend to write a book describing their decade of travel, utilizing the vast quantity of photographs and notes they have accumulated, and also to give lectures. While travelling they support themselves by such money as they can earn and help they receive from friends.

During their journeys, the Heckers have eaten monkey stew, been eaten by leeches, captured by brigands, chased by Bulgarian officials, and taken on tiger hunts by an Indian rajah, and ordered out of India because the bride wore no veil.

Kindness from country people, as well as from German and other foreign residents.

Requisite On the Farm—Every farmer and stock-raiser should keep a supply of Dr. Thomas' Electric Oil on hand, not only as a ready remedy for all ills in the family, but because it is a horse and cattle medicine of great potency. As a substitute for sweet oil for horses and cattle affected by colic it far surpasses anything that can be administered.

## A Curious Souvenir

Curious things are preserved as souvenirs. The death at St. Thomas, Ontario, of the famous elephant Jumbo has been discussed recently in Western Ontario papers, and a man comes forward with the claim that he secured some of the hairs of Jumbo's trunk at the time of the disaster, "and" he writes triumphantly, "I still have two."

North China trade with Mongolia, which was stopped four years ago, may be revived.

There are more than 1,024,000 persons by the name of Johnson in the United States.

Seventeen silver coins of 1296 were found recently at Berwick, England.

## Favor World Free Trade

Holland, Belgium, and Luxembourg Entered Into Pact Last Year

The people of the Netherlands are intensely in favor of the re-establishment of world free trade and therefore hope that many other nations will soon join them, Belgium and Luxembourg in the free trade pact achieved among them last summer. This was the opinion expressed by D. A. Delprat, Amsterdam business man who was in Montreal.

Holland is a large exporter of eggs, butter, cheese and bacon to Britain, and Mr. Delprat expressed the fear that the newly announced Empire tariffs would probably do considerable harm to this export trade of the Netherlands.

I cannot speak with certainty about it," he said, "because for the past two months I have been travelling in the United States, and have not received information.

"But I can speak of conditions in the United States," he added. "There it seems to me that people are feeling much more confident than they did a year ago. I think that the depression is beginning to turn there—there is more than I can at present say of Holland."

## To Safeguard Shipping

Extra Precautions Will Be Taken On Hudson Bay Route

Further precautions to prevent loss of ships on the new Hudson Bay route will be undertaken next summer by the government, according to word brought to The Star, Man., by J. A. Campbell, I.C.C. local barrister, who was called to Ottawa to be present at the inquiry into the loss of the S.S. Bright Fan, which sank in Hudson Strait, October 1, after striking an iceberg.

Mr. Campbell states that the S.S. N. B. McLean, government icebreaker on patrol duty in the far north, will be provided with chains of the waters traversed by vessels using the grain route, and that these Canadian charts will be available to masters of vessels. The "MacLean" will also be in the neighborhood, as added protection, as was the case this year.

Certain morbid conditions must exist in the stomach and intestines to encourage worms, and they will exist as long as these morbid conditions permit them to. To be rid of them and spare the child suffering, use Miller's Worm Powders. They will correct the digestive irregularities by destroying the worms, conditions favorable to worms will disappear, and the child will have no more suffering from that cause.

## Wanted Them To Fit

MacPherson was to be married. "You'll be given a send-off" he inquired of his best man.

"Certainly."  
"With rice and white ribbons and balloons?"  
"Aye."  
"And old shoes thrown after us?"  
"Of course."  
"Well, keep in mind—I wear eight an Maggie takes five."

For treatment of caked bags in cows, or garget, use Douglas' Egyptian Liniment—the quick, sure remedy. Saves time and expense. Prevents blebbed skin.

## Lady Oxford Writes Ads.

Londoners were amazed to find that Lady Oxford, better known as Margaret Asquith, was writing advertisement. A full-page ad in several leading London papers bore her endorsement for a furniture company.

Death Of Well-Known Painter Of Animal Life Announced At Vancouver

With the death here of Charles Warburton Young, aged 66, West Vancouver, Canada lost one of her greatest painters of animal and insect life.

Through his intimate knowledge of animal life in Canada, particularly in British Columbia, and through his realistic portrayals of their likenesses on canvas, Mr. Warburton gained wide recognition.

Coming to Canada in his youth from England, he became noted as a big game hunter. Thirty years ago he came to Vancouver, where he engaged in microscopic painting for the animal health branch of the Dominion Government. Many of his paintings on animal and insect life appear in government publications.

He is survived by three daughters at home, three brothers, Dr. W. T. H. Young, of Peterborough; Col. A. H. Young, of Souris, Man., and Gen. Walter Young, in India.

## The President Of Mars

A dignified looking gentleman assumed authorities at Moravia-Ostrava, Czechoslovakia, by applying for a passport to Mars. He said he was the president of that planet, down here to study business conditions. He found them not so good, he said, and wanted to go back. Jan Savile, as his name turned out to be, was turned over to the medical authorities.

After an acute illness or a serious operation, careful skillful nursing of the patient is highly necessary.

This is as true of a nation as it is of a person.

For Creamed SOUPS and SAUCES

If YOU have not tried St. Charles Milk you will be surprised at the improved flavor it gives to cream soups and sauces. It is a pure cream product, as and with it you can make hundreds of delicious dishes that you and your family will enjoy.

Always ask for St. Charles by name and then you are certain that you are obtaining the best evaporated milk.

W. N. U. 1969

(By Arthur J. Reynolds In Agricultural and Industrial Progress)

Now we come to office number two, that of loaning the money paid in to the bank by its shareholders and depositors, to the public. This is the business that comprises the main work of the bank and is really the most arduous and responsible of its duties. The hazards in banking are of two kinds. One part of its customers, strange to say, is not as prevalent as many people think, but a bad crop, for instance, in Western Canada, or a fire, or an aftermath of losses, or commercial failures in Eastern Canada do the same thing, so banks are often called on to make loans. There is always a big demand for money in good times which is very hard to get when prosperity slackens. In Canada, for instance, the Canadian banks operate, lays down very stringent regulations regarding what a bank can loan upon, and, broadly speaking, a bank can only agree to supply only liquid capital or commerce. It is debared from long term loans in the shape of mortgages, property or other securities. Loans of this sort are taken care of by other institutions such as trust companies, insurance companies and so on. The bank loan business is a branch of the bank loans in various ways. For instance, a branch finances a lumberman to take out a huge lumber camp, and then it pays back when he sells it. The textile manufacturer is financed by his raw wool. He pays when he is made ready for the market. The farmer is financed for his spring expenses. He pays from his crop in the fall. In fact, any industry that buys and sells on credit is financed by the bank provided, of course, that the industry is in good shape.

WORLD HAPPENINGS  
BRIEFLY TOLD

Both houses of the Bahamas legislature approved the Ottawa economic conference agreements unanimously.

Germany has completed delivery of Soviet Russia's order for 350,000 tons of iron and steel.

Prime Minister Ramsay MacDonald vehemently criticized laudatory preparations for the projected world economic conference in the House of Commons.

Dr. Howard Carter, the sole survivor of that little party which, led by the late Lord Carnarvon, discovered the tomb of Tutankhamen, has left once more for Egypt.

Forty-three men and one woman have started working against time to whip into shape before Christmas a constitution for India's population of 380,000,000.

Jobless men who turned to prospecting for gold along the Fraser River and its tributaries during the summer months, have met with gratifying success, according to reports received at the Chamber of Mines, Vancouver.

The power of the Minister of National Revenue to fix valuations for customs duty on imports to Canada will be curtailed by the adoption of Bill No. 6, an act to amend the Customs Act, which was passed by the House Committee.

Princess Imereitinsky, English wife of the Russian nobleman, and widely acclaimed as one of England's most beautiful women, has been granted a decree null of divorce from Prince George Imereitinsky, on the grounds of misconduct.

For the three years ending March 31, 1932, a total of 15,364 persons were deported from Canada, according to a return tabled in the House of Commons recently. More than one-third, or 5,573 were English, while the next largest national group were Scots, who numbered 2,600.

Relief tickets entitling the bearer to food and bed will soon be offered for sale to Winnipeg citizens, who, in turn, may distribute them to needy men. The tickets, which will assure the donor his contribution is being used for its intentional purpose, will sell at 10 cents each.

A "potato famine" is foreseen early in the new year, says the Toronto Star, as a result of widespread "late blight and rot" in the Ontario crop. Farmers of the province will lose at least one-fifth of their harvested crop, representing a cash value of about \$1,000,000, says the newspaper.

SOURD ON THE  
WORLD?—THAT'S LIVER

Wake up your Liver Bile

—No Calomel necessary

Many people who feel sour, sluggish and generally wretched make the mistake of taking salts, oil, mineral water, laxative pills or other such remedies, which only make the bowels and ignore the liver. The liver needs to be wakened up by the use of Carter's Little Liver Pills. Start your liver pouring the daily two pills of liquid bile to your bowels. Get your stomach and intestines working as they should, and you are well.

Carter's Little Liver Pills will soon fix you up. Fully regulated. Safe. Sure. Quick. Ask for them by name. Cause no addiction. 50¢. at all druggists.

The Girl: "So you've seen Daddy, darling? Did he behave like a lamb?"  
Sister (grinily): "Absolutely! Every time I spoke he said 'Bah!'"

The first sandwich is said to have been made in the 17th century.

Roast whale was offered at Blackball, England, recently.

Nervous—Could Not Sleep  
Tired Out All The Time

Mrs. George Beriber, Nauviggewank, N.B., writes: "I was so very nervous I could not sleep at night, and felt tired out all the time."

A neighbor told me about Milburn's Heart and Nerve Pills, and as she was using them at the time she gave me some to try. I found they were doing me so much good I procured two boxes and they proved of wonderful help to me."

Has Become Proficient  
In Chinese Language

McGill Student Learned At Laundry To Talk Fluently

If everyone persevered as much as Gordon R. Taylor, of Ottawa, the Chinese laundry business would be revolutionized into the teaching profession.

When Taylor, now entering upon his M.A. studies at McGill University, was nine years old his father sent him to the laundry to get the inevitable two collars and one shirt. Immediately intrigued by the sing-song language he heard there he decided first to make friends with the Chinese, his later instructors in their language. This accomplished he, over a period of years, exhausted the knowledge of his instructors and was turned over to an old Chinese teacher.

Armed with his knowledge, Taylor strolled into the office of Dr. Kiang Kang-hu, professor of Chinese studies at McGill University, and burst into a flood of Cantonese which left that avant-garde, a graduate of Queen's University, Taylor speaks, reads and writes the southern China dialect.

He hopes to go to China some day.

## Recipes For This Week

(By Betty Barclay)

## RAMEKIN OF CHICKEN

5 tablespoons quick-cooking tapioca.  
1 cup milk.  
¼ teaspoon salt.  
Dash of Cayenne.  
½ tablespoon parsley, finely cut.  
1 tablespoon butter.  
2½ cups cooked chicken, chopped.  
Combine quick-cooking tapioca, milk, salt, Cayenne, parsley, butter, and chicken. Let stand until mixture thickens slightly (5 minutes). Turn into greased ramekins or custard cups. Bake in moderate oven (350 degree Fahrenheit) 25 minutes, or until done. Serves 6.

## COCONUT PUFFS

3 egg whites.  
2½ teaspoons cornstarch.  
1 cup sugar.  
Dash of salt.  
1½ cups shredded coconut.  
½ teaspoon vanilla.  
¼ teaspoon almond extract.  
Place egg whites in top of double boiler and beat until stiff. Mix cornstarch with sugar and beat gradually into egg whites. Place over hot water and heat about 2 minutes, or until thick around edge. Remove from fire. Add salt, coconut, and flavoring. Drop from teaspoon on greased baking sheet. Bake in slow oven (325 degree Fahrenheit) 5 minutes, or until slightly browned. Makes 30 small puffs.

## The Most Familiar

A teacher had been telling an infant's class about the Ten Commandments. In order to test their memories, she asked: "Can anyone give me a commandment containing only four words?"

A hand was raised immediately. "Well?" said the teacher.

"Keep off the grass," said the youngster.

## SUNDAY SCHOOL LESSON

NOVEMBER 27

## STEWARDSHIP OF LIFE

Golden Text: "First they gave their own selves to the Lord." 2 Corinthians 8:5.  
Lesson: Exodus 3:1-12; Isaiah 6:1-8; Matthew 25:1-46; Mark 1:16-20; Acts 26:12-19; 1 Corinthians 9:17-27.  
Devotional Reading: Matthew 6:28-34.

## Explanations and Comments

Four Disciples Called To Fellowship and To Service, Mark 1:16-20.—Walking along the shore of the Sea of Galilee, Jesus saw the two brothers, Peter and Andrew, casting a net in the sea, letting it down and then lifting it up, first on one side of the boat and then on the other, for they were fishermen. The successful use of this net, W. M. Thompson explains, requires a keen eye, an active frame, and great skill in throwing. The fisherman must also be patient, watchful, and prompt in seizing the exact moment to throw. These were qualities needed by fishers of men, and Jesus called to them: "Come ye after Me, and I will make you to become fishers of men."

It is unlikely that the disciples understood at this time all that this phrase, fishers of men, meant. Jesus' ministry was an itinerant one; He went about from place to place teaching and preaching and healing. The nature of His work made the fellowship and apprenticeship of disciples necessary. He had many things to say that only trained hearers could follow. Many things to do that only loyal pupils could undertake, a legacy of service that only skilled followers could carry out. At once the four left their nets and followed Him.

Paul Called To Dedicate His Life To Christian Work, Acts 26:12-19.—It was midday on his way to Damascus to persecute the Christians that Paul saw a light brighter than that of the sun and heard a voice saying, "Saul, Saul, why persecutest thou Me? It is hard for thee to kick against the pricks." "Paul is really in the position of a plough-ox. Jesus is his driver and holds the goad. Paul can no more resist Jesus than the plough-ox can resist his driver."

"Remember that the heavenly vision comes to you in very humble and every-day form, not in visions of angels nor light flashing down from the skies. It comes in the simple guise of duty; the thing which you ought to do today, and which you know that you ought to do. That is the heavenly vision of the moment. You are to give up that sin, you are to undertake that bit of work for others, you are to break from certain habits and companionships. That is what God says to you at the moment. You are sure of it. It is the vision which you have to follow—follow it!"—J. G. Greenough.

## BANANA MERINGUE PIE

1½ cups (1 can) Eagle Brand Sweetened Condensed Milk.  
¼ cup lemon juice.  
2 medium sized bananas (cut in small pieces).  
2 egg whites.  
2 tablespoons granulated sugar.

Zwieback Pie crust.  
Blend together Eagle Brand Sweetened Condensed Milk and lemon juice.

Fold in finely cut bananas. Pour into nine-inch pie plate lined with Zwieback Pie Crust. Cover with meringue made by beating egg whites until stiff and adding sugar. Bake in a moderate oven (350 degrees Fahrenheit) until brown. Chill before serving.

## ZWIEBACK PIE CRUST

Roll enough zwieback to make one cup crumbs. Mix with ¼ cup Eagle Brand Sweetened Condensed Milk. Line buttered pie plate, packing mixture in well. Pour in filling as usual.

## Seeking Altitude Record

The British air ministry is completing plans for an aeroplane which it hopes will beat the world's altitude record. Recently a test pilot reached a height only two miles lower than Professor Piccard's record, made with a balloon.

Canada's area is 3,860,043 square miles or more than 27 per cent of the total area of the British Empire.

## The Newest Measure

Aunt Maria, a negro cook, specializing in molasses cookies, was one day asked to give her recipe.

"It's an easy one," she replied. "Ah takes a cup of flour, more or less, and ah adds two gullups of molasses."

"But," interrupted the questioner, "what are gullups?"

"Why, honey, don't you know? When you have a jug of molasses and turns it up, the molasses says 'Gullup,' runs a little more, then says 'Gullup' again. Well, ah takes those two."

Italy will continue its bounties to Italian navigation lines.

Finland plans a big public-works programme.

DEFINITE HELP FOR  
DWELLERS IN  
APARTMENTS

Odorless way found to cook fish, cauliflower and cabbage

CANAPAR IS A PRODUCT OF HAMILTON FIRM

Lives there a woman, in apartment, duplex or home, who has not at some time or other reluctantly foregone fish, cabbage, and cauliflower because of the odors they give off when being cooked? Or who has not suffered because other people close by who cooked these foods regardless? Canapar entirely does away with this annoyance. More than that, it actually improves flavor and food value. Cooking in Canapar parallels the famous French method of simmering and confining food in its flavor to the closed casserole. Canapar comes in large sheets, in a handy-size package. When boiling vegetables you simply wet the sheet of Canapar and make a bag similar to a pudding bag. If you are steaming them you line your steamer with Canapar, arrange food and season, and fold back corner of the Canapar to prevent steam from dripping back.

Baked or steamed fish is particularly delicious done this way. No fishy odor in the kitchen, no gummy kettle to clean. When roasting meats, line the pan with Canapar. It prevents the fats and juices from burning, and eliminates scouring of the pan afterwards.

Canapar saves fuel. You can cook three vegetables simultaneously in the same saucepan with it, without intermingling of flavors. And it is very economical. Just trim the sheet after using it, hang it on the towel rack to dry. Use it over and over again.

Lots of women use Canapar for a dish cloth—it is so silky and satisfactory and does not spread ink. This is a particularly good use if you happen to place the sheet of Canapar while testing the food during the cooking of it. Canapar is made by the makers of PARASOL the famous heavy waxed paper in the Green box.

## Special Offer

Most grocers, druggists and department stores sell Canapar. If you don't, send the coupon direct and we'll give you a new and unique booklet entitled "Leftovers" containing one hundred recipes as a bonus for your trouble.

Appleford Paper Products, Ltd., Hamilton, Ontario.

## TARIFF CHANGES MEET OPPOSITION OF WESTERNERS

Ottawa, Ont.—The House of Commons became embroiled on Tuesday night and only 11 tariff changes resulting from the Anglo-Canadian trade treaty were passed in the short session.

A 10 per cent. tariff against foreign barbed wire aroused the ire of western Liberals and Progressives. They charged it would boost prices to much-harassed farmers at a time when efforts should be focused on reducing production costs.

German and Dutch manufacturers of barbed wire, said Premier R. B. Bennett, "have resolved to destroy the Canadian industry, dumping large quantities in this country, demoralizing prices." The tariff increase was designed to curb the dumping, giving Canadian manufacturers reasonable protection. He doubted if there would be any material increase in prices.

Finally the wire item passed but another obstacle lay ahead, 25 per cent. tariffs against foreign cream separators drew more fire than the barbed wire in a much shorter period of time. Once again opposition members said the tariff increases would raise prices to the farmers.

The United Kingdom would continue to have free entry for cream separators, said Hon. Harry Stevens, Minister of Trade and Commerce.

Manufacturers in that country had assured him they could supply the Canadian market without increasing prices.

### Hazardous Flights

United States To Keep Closer Supervision On Foilhardy Airmen

Washington.—Adventurous United States airmen planning hazardous flights to foreign lands will have to pass strict government scrutiny in the future and may be denied permission if the undertaking seems too risky.

The aeronautics branch of the United States Department of Commerce served notice today that it will exercise closer supervision over preparations for such flights by citizens than it has in the past.

### Death Of Major Sifton

Secretary-Treasurer Of Winnipeg Free Press Passes In Toronto

Toronto, Ont.—John Wright Sifton, secretary-treasurer of the Winnipeg Free Press, died November 15.

Mr. Sifton, who was 46 years old, had lived in Toronto for some time following a long holiday in the southern United States. He died after a long illness, although his condition did not become critical until a few weeks ago.

Mrs. Sifton, who was formerly Miss Grace Christine Bell, Montreal, survives.

For Armament Reduction

London, Eng.—Great Britain wants reduction of armaments by land, sea and air, Sir John Simon, secretary for foreign affairs, by a declaration before the Bureau of Disarmament Conference at Geneva, and the British Government in the form of a white paper tabled in the House of Commons today, laid down the main lines of British disarmament policy.

Loan Is Subscribed

Montreal, Que.—Beyond confirming the statement by Hon. E. N. Rhodes, Minister of Finance, that the new Dominion loan of \$80,000,000 had been fully subscribed, the central campaign committee here had no information to offer. Until all the applications had been totalled up it would not be possible to state the extent of the over-subscription.

No Stigma Attached To Relief

Calgary, Alta.—Declaring no stigma could be attached to those in need of relief through misfortune, the annual convention of the Alberta Association of Municipal Districts rejected a resolution urging that each municipality establish a paupers' fund from which relief payments would be made.

May Re-Open Coast Smelter

Victoria, B.C.—Possibility of reopening the Ladysmith smelter to handle the copper ores from the Britannia mines on Howe Sound, so as to enable those mines to come in under the British preference and continue operating, was under discussion by members of the government.

## New Duties Now Effective

Ottawa Trade Agreements Now Law In Britain

London, Eng.—The Ottawa agreement implementing the United Kingdom's new trade pact with the Dominions has become law. New duties set out in the bill became effective at midnight, November 16, replacing those of the Import Duties Act passed last year.

The bill was given third reading by the House of Lords and immediately afterwards obtained royal assent by commission.

Meanwhile a treasury order was issued extending, without interrupting, general import preferences and special tariffs imposed under the Import Duties Act. Another order made the Ottawa preferences effective. Had no agreements been reached at Ottawa the preference would have lapsed November 15.

The treasury order continued preferences on goods from all countries of the British Empire with the exception of the Irish Free State, which failed to conclude an agreement with the United Kingdom at Ottawa.

Remaining provisions of the Ottawa Agreements Act, brought into force at once, concern powers and duties of the treasury and the board of trade which require no immediate action.

## Figure Tariff Changes

Members Of Parliament Falter In

Realms Of Higher Mathematics

Ottawa, Ont.—Staid members of parliament reached for pencils and scratch pads when discussing changes in the Canadian tariff resulting from the Anglo-Canadian trade treaty.

Liberals were in an inquisitive mood, wanting to know to what levels the exchange dumping duties, excise duties and sales tax would elevate tariff items specified in the agreement.

Members began involved calculations, most of them giving up in disgust when the realms of higher mathematics were reached.

## Youths To Be Spanked

Attorney-General Makes Punishment

At The Crime

Victoria, B.C.—British Columbia youths who think it is smart to drink in beer parlors will be punished by the good old-fashioned method used by fathers of the last generation in the woodshed.

They will be spanked in the place provided by nature for such correction, under arrangements instituted by the attorney-general's department.

This interesting new punishment, designed to chastise boys, without confining them with criminals in jail, was devised by Attorney-General R. H. Pooley when he was called on to review the case of two Kamloops youngsters.

They were convicted of taking a pair of girls to the town of Chase and drinking beer in a beer parlor there, although they were minors and not entitled to enter such premises.

## Unemployed Spectre

800,000 Men, Women and Children

Receiving Relief In Canada

Ottawa, Ont.—Canada has 800,000 men, women and children receiving relief, Hon. W. A. Gordon, Minister of Labor, announced in the House of Commons.

Of the total number mentioned, said Mr. Gordon, it was estimated that 144,000 were people who had not worked very steadily since 1919.

Another 100,000 were what were known as transients, 50 per cent. of whom were recent arrivals in Canada.

Grain Shipped Through Maritimes

Saint John, N.B.—A million bushels of grain are moving eastward for shipment through this port early in December. It has already been purchased for shipment via Saint John, it was announced by Harry Commissioner Thomas Nagle on his return from Montreal, where he interviewed railway and steamship officials and some of the leading shippers.

Favors Longer Hours

Montreal, Que.—Longer working hours "a 12 or 14-hour day of labor"—were suggested by Beaudry LeMay, former president of the Canadian Bankers' Association and General Manager of La Banque Canadienne Nationale, addressing the Purchasing Agents' Association here.

## Thief Drops Loot

Jewelry Taken From Residence Is Recovered

Vancouver, B.C.—"Was my face red!" the thief probably remarked as he told of his night's venture.

He made a clean get-away with \$1,800 worth of jewelry from the home of Mrs. G. M. Hughes, taking the dresser drawer in which it was concealed. He cross-countryed backyards and hurdled fences until in the safety of his hide-out he looked to slout again over his loot.

The draw was empty. The denouement came Wednesday when the jewelry was found in an adjoining yard from the home from which it was stolen. The thief had dropped it as he carefully guarded the worthless drawer in the course of his post-Olympic effort.

## Income Tax Collections

Increase Is Shown In Figures Issued At Ottawa

Ottawa, Ont.—An increase of \$459,454 in income tax collections is shown in the figures issued by the Department of National Revenue. The total for October, 1931, was \$295,443, and for last month \$1,284,898.

For the seven months of the fiscal year income tax collections have increased by \$2,325,998 over the same period last year. Total collections were \$50,546,512 in the 1931 period and \$62,872,510 this year.

## EVOLVE PLAN IN EUROPE TO AID UNEMPLOYMENT

Paris, France.—The creation of an economic consortium by Great Britain, France and Germany which is designed to assist in the return of prosperity and in coping with the unemployed problem, was announced by Raymond Patenotre, who will be in charge of its operations.

"We foresee," said M. Patenotre, "a return of prosperity by the natural process of the development of industrialization."

"The unemployed in the smaller depressed countries will be given work, while the jobless in the larger countries will be relieved by the operation of factories."

The plan was described as a combination of French capital and German industry, with guarantees covering the subjects of insurance, security and non-competition.

The first project of the consortium will be the offer of a loan of 17,000,000 francs (currently \$680,000,000) for the electrification of railways in Poland, Roumania, Iraq and Portugal.

The Paris edition of the New York Herald Tribune said France and Great Britain would provide 40 per cent. of this loan each, and Germany would furnish 20 per cent.

The consortium will consist of three syndicates—Franco-German financial experts, British, French and German bankers, and a Franco-German syndicate designed to carry out recommendations of the banking group in the electrification projects.

M. Patenotre said the organization was purely an economic agreement.

## MORROW FIANCÉ

Aubrey Niel Morgan, business man of Cardiff, Wales, whose engagement to Miss Elizabeth Morrow, eldest daughter of the late Senator Dwight Morrow, was recently announced. Miss Morrow met her fiancé while visiting London with her father in 1930.

## Exports Increased

Wheat Shipments Boost Exports For Month Of October

Ottawa, Ont.—Exports to foreign countries increased by \$1,088,178 during October, according to figures released by the Department of National Revenue.

The increase, compared with the figures for October, 1931, occurred chiefly in exports of wheat, the volume of which was more than double that of the same month last year.

Last month's exports had a value of \$56,826,095, as against \$55,537,917 for October, 1931. Re-exports were \$534,279 compared with \$996,082 for the same month last year.

A heavy decline in imports from \$46,332,572 in October a year ago to \$37,582,206 last month, boosted Canada's export balance to \$19,974,068. Total trade for the month under review had a value of \$94,346,580, as against \$101,466,371 for October, 1931.

## Winter Fair Winners

Alberta, Saskatchewan and Manitoba Share In Honors

Toronto, Ont.—James Whitehead, grower, of Saskatoon, scored a double victory at the Royal Winter Fair as judging of grain exhibits got under way.

In the grain in sheaves section, Whitehead won with his sample of wheat and also took first place in the barley division. Oats award went to Carl Schmidt of Carlsruhe, Ontario.

The entry of Patrick Shea, Winnipeg, "Warrior," was declared champion gelding, with reserve going to "Martin," owned by Gibbs Brothers, Lumsden, Saskatchewan.

"Sandy," owned by Jack Lewis, Delroy, Alberta, won the Clydesdale gelding special and "Martin," owned by Gibbs Brothers, the Belgian special.

No Report Received

Ottawa, Ont.—Department of justice has received no report from the investigation into the recent riots at Portmouth penitentiary, Hon. Hugh Guthrie told the House of Commons.

## BRITISH ADMIRAL WEDS AT EIGHTY

The wedding of Admiral Sir George Egerson and Margaret Stella was recorded by our press photographer as the couple left Ringwood Parish Church, in England. The bridegroom who is eighty years of age, entered the British Navy in 1886 and retired in 1916, during which time he held several important appointments, including Naval A.D.C. to the King in 1905. He was second in command of the Atlantic Fleet in 1904-7 and Second Sea Lord in 1911-12.

## Russia's Food Problem Is Becoming Serious

People Are Now Subsisting On Most Stringent Rations

Moscow, Russia.—On the eve of the conclusion of the five-year plan—which is being ended in four years—Soviet Russia is struggling with the old and difficult problem of food for its people.

The food situation is bound to be one of the chief problems of the second five-year plan, now in the process of drafting. Russians are subsisting on most stringent rations.

There is a serious shortage of such commodities as wheat, sugar and butter. In the second plan, by all indications, greater emphasis than ever will be placed on the improvement of general living standards.

Although the state of the country's food supply is admittedly bad—some Russians say it is worse than in 1928, when the five-year plan started—no facts are available here to bear out dire predictions heard abroad of widespread suffering this winter. On the contrary, the 1932 harvest is expected to ease present harsh conditions to some extent.

The country failed last year to achieve planned increase in industrial production, but 1932 will record appreciable increases over the previous year.

## Policy Unchanged

Relief Administration For West Is Discussed At Ottawa

Ottawa, Ont.—Details of unemployed relief administration in Manitoba and Saskatchewan were discussed when Hon. M. A. MacPherson, provincial treasurer of Saskatchewan, and Hon. Ewen MacPherson, provincial treasurer of Manitoba, conferred with Harry Herford, director of unemployment relief for Canada.

The meeting followed a conference with Hon. W. A. Gordon, Minister of Labor, last night, when George Hoadley, Minister of Agriculture for Alberta, was also present.

No change in the general policy governing relief in western Canada was decided upon, it is understood.

## PRINCE GIVEN WARM WELCOME IN N. IRELAND

Belfast, Northern Ireland.—Citizens of Belfast and the surrounding countryside turned out in record numbers to give the Prince of Wales an open-air welcome when he set foot on Irish soil for the first time—a welcome that overshadowed a display of bad temper by objecting nationalists.

When the prince arrived in the harbor a group of bombing planes saluted from overhead. Dockside workers waved flags and sent up such cheers the roar of the 21-gun salute from two warships scarcely drowned them out.

Earlier, an effort that might have had dire consequences was made to prevent sightseers from coming to Belfast to see the prince, smiling good naturedly, take part in a five-mile parade to Stormont where he dedicated the new northern Ireland Parliament Buildings.

Long sections of the railroad between Kells, County Meath, in the Free State, and Belfast, were torn up, and other parts of the road were mined. Rails also were ripped up in the vicinity of Cavan, also in the Free State.

At one end of the breaks in the tracks were placed notices reading: "Ireland belongs to the Irish, both north and south." Red flags were placed at points where the rails were broken.

The Prince, wearing the uniform of a colonel of the Irish Guards, was welcomed by the Duke of Abercorn, Governor of Ulster, Viscount Craigavon, the Prime Minister, and Sir R. Dawson Bates, secretary for home affairs. Then he stepped ashore amid wild cheering.

Of the 12,000 men on guard along the five mile route to Stormont, 4,000 were armed soldiers and police and 8,000 were volunteer Orangemen.

The Prince recalled the heroic part played by Ulster in the World War when he made his speech of dedication.

"It is my father's earnest prayer," he said, "that you will meet all of those difficulties which confront the world as well as your own special problems with the courage, tenacity, loyalty and devotion which has always characterized the men of northern Ireland and made them famous in the annals of the empire."

## BRITISH PLAN FOR THE SOLVING OF ARMS ISSUE

Geneva, Switzerland.—Great Britain made a definite move to bring Germany back into the disarmament conference today when Sir John Simon, British Foreign Secretary, submitted to the conference bureau a plan designed to satisfy the German demand for arms equality.

The British plan for solving the equality issue rests upon four points. First: It provides for the re-affirmation by the European powers of the Kellogg pact.

Second: The plan provides that "limitation of Germany's armaments should be accomplished by the same disarmament convention which will define the limitations of the armaments of others."

This, Sir John explained, means that the limits of the new treaty, voluntarily accepted by all states, will substitute for Germany and her defeated allies in the World War the restrictive clauses of the peace treaties.

Third: "The newly expressed limitations in the case of Germany would last for the same period and be subject to the same methods of revision as those for all other countries."

The fourth point concerns Germany's request that she be permitted the same kind of arms as the others.

## War Debt Course

Hoover Is Opposed To Policy Of Debt Extension

Washington.—Gathering his advisors around him, President Herbert Hoover plunged today deep into consideration of the United States war debt course and of the policies his administration will pursue until its March 4 conclusion.

Ogden Mills, secretary of the treasury, discussed the policies to be outlined shortly in response to requests from Great Britain, France and other debtors for a review of their obligations and for a suspension of payments due December 15.

Although the president himself remained silent in debt matters, as possibly he may until the closer approach of his conference with Franklin D. Roosevelt, the president-elect, Mr. Hoover was represented in authoritative quarters as definitely opposed to another year's moratorium.

The president is not convinced, it was said, that all payments due the United States December 15, will not be made and feels that a more rigid attitude should be adopted than any wholesale suspension of these payments.

## Preference For Canadian Ports

Will Be Used Wherever Possible For Overseas Wheat Shipments

Winnipeg, Man.—All things being equal, western exporters of grain will continue to use Canadian Atlantic and Pacific ports for the movement of wheat to the United Kingdom.

Leading grain shippers interviewed by the Canadian Press stated that wherever possible—Canadian ports were given the preference in handling Canadian grain for shipment overseas.

Many Post Offices Closed

Ottawa, Ont.—A total of 545 post offices have been closed in Canada since August 1, 1930, according to a return filed in the House of Commons. New post offices open since that date numbered 278, of which 117 "covered their expenses."

May Revise Pension Act

Ottawa, Ont.—Hon. W. A. Gordon, Minister of Labor, intimated in the House of Commons that a general revision of the old age pension legislation might take place at the adjourned parliamentary session next January.

No Benefit Seen

Manchester, Eng.—The Manchester Chamber of Commerce believes reductions in the Canadian tariff already announced are unlikely to enable British cotton, artificial silk and textile exporters appreciably to increase their trade.

Must Stay Put

Calgary, Alberta.—Alberta relief commission has announced efforts to check the wandering of single unemployed in the province. The commission has ruled single workless seeking relief will have to acquire it at the place they are now located.

## Soil Moisture Experiments

Grain Crops Use Moisture At Rapid Rate During Growing Season

Experiments on soil moisture, conducted at the Dominion Experimental Station, Swift Current, Sask., have revealed some surprising facts on the vital importance of moisture in the production of grain. Grain seeded in many sections of the prairies rarely receives sufficient moisture to promote a normal growth. The prospect of heavy yields is frequently spoiled by spells of dry weather as the season advances.

Grain crops can use water, during their growth, at a surprisingly rapid rate and in considerable volume. During the past season at Swift Current a crop of wheat used a total of eighteen and a half inches of water. Eight inches of this came in the form of rain during the growing period and the balance was present as available water in the soil. The rate of use of water by the crop was at first quite slow; for the first two weeks after emergence it averaged the equivalent of six-hundredths of an inch of rain daily. This rate rapidly increased with growth and reached a maximum of forty-eight-hundredths of an inch daily during the week commencing on June 15. In this week the crop used water equivalent to forty-three per cent of the total rainfall. After July 20 the rate of use of water fell off rapidly and at harvest was again only six-hundredths of an inch daily.

The foregoing is an example of a crop produced under almost ideal conditions. Much less favorable conditions existed for a crop seeded on land closely resembling summerfallow in the field. This crop received the same amount of rainfall, but only the equivalent of three and one-half inches of water was available in the soil. Until June 15 both crops used water at the same rate. From this date the growth was noticeably different. An examination of soil moisture conditions showed that in the seven-day period from June 15 to 22 the crop on summerfallow had used forty-eight per cent of its total moisture reserve, while by June 22 only a very small quantity remained.

Wheat crops when subjected to deficient moisture conditions pass through so-called critical periods when the absence of sufficient moisture definitely depresses the yield of grain. In the cases quoted the first crop was at no time subjected to any critical period. The second crop, corresponding to that seeded on summerfallow under field conditions, was undoubtedly severely injured during the week ending June 22. At this time, with no rain and depleted soil moisture, it was impossible for the plants to secure sufficient moisture to function normally. Although heavy rains occurred early in July these failed to offset the injury previously sustained.

—S. Barnes, Experimental Station, Swift Current.

## Award Goes To Galsworthy

Second Englishman To Win Nobel Prize For Literature

The 1932 Nobel prize for literature has been awarded to John Galsworthy, the British novelist.

The author of "The Forsyte Saga" had been mentioned in newspaper predictions as the probable recipient of the award. Last year's prize was won by Erik A. Karfeldt, of Sweden.

Only one other Englishman has won the reward for literature, Rudyard Kipling took it in 1907. George Bernard Shaw, an Irishman, won it in 1925.

The most famous of his works, of course, are those comprising the Forsyte series, which trace the fictional history of the Forsyte family in England and abroad.

He also has engaged successfully in the drama, a field in which his notable productions include "Loyalties" in 1922 and "Old English" in which George Arliss was an outstanding success. He also wrote "Escape" in 1926 and "Exiled" three years later, and a number of other plays.

## Extraordinary Visibility

From the summit of Mount Washington, New Hampshire, looking west in the east, observers recently were able to see Montreal, more than 100 miles northwest of there. The day was described as offering visibility unparalleled within the memory of the oldest inhabitants.

First Tramp: "What would you do if you won the first prize in the big Sweep?"

Second Tramp: "I'd have the blinkin' park benches upholstered."

Time is dumb; its effects are only heard.

W. N. U. 1939

## Insulating Material From Rock

Rock Wool Is One Of The Most Effective Insulating Materials

As an outcome of the trend toward a greater use of insulating material in the construction of homes and offices, and in other fields, the Canadian Government Department of Mines foresees the establishment of a rock wool manufacturing industry in Canada. Should this materialize the development of the large deposits of dolomite in the Niagara Peninsula of Ontario would follow, it is stated. Surveys conducted by the Department disclosed the presence of these self-fluxing, argillaceous deposits and researches indicated their suitability as raw material for the manufacture of rock wool. At present the total requirements of the product are imported.

Rock wool is one of the most effective insulating products on the market. It is made by melting suitable natural rock to a very fluid condition in a cupola furnace using coke as fuel. The molten material issues from the furnace in a small stream, and is atomized by a blast of steam, which converts it into a mass of fine, pliable, colourless, glassy fibres. These fibres constitute the rock wool of commerce. It is very similar in most respects to slag wool, but is practically free from the deleterious element, sulphur, compounds of which are sometimes found in objectionable quantities in slag wool.

The insulating value of rock wool is due to the myriads of tiny air cells entrained with the interlaced fibres. Its field of usefulness for insulating purposes ranges from the lowest industrial temperature up to 1,000 degrees Fahrenheit. It is marketed for a wide variety of uses including building insulation, linings for gas and electric stoves, and refrigerators; covering for steam pipes, oil stills, hot water pipes, boilers and furnaces. It is also the principal ingredient of an insulating cement and of an acoustic tile, the latter being used extensively in offices, motion picture theatres and auditoria.

## Chinese Use Pictures

Children Are Taught By Sight Instead

Douglas W. Thompson, writing in the Contemporary Review, London, says:

"What is a specialist's work with us is the established literature of the Chinese. They use no alphabet, are not troubled with parts of speech, have no declensions rubbed into their skulls as young, but an enormous number of neat pictures, each one depicting some thought or thing. Every conception from a blade of grass to the theory of the curve in light is expressed by a picture of how it appears to the eye and heart. The majority of these pictures are thousands of years old, and so are vivid notes of the world of men through many centuries. While an English word is the symbol of a sound, the Chinese word is a picture of a thing or a number of things in relation to each other. How is it done? How can such ideas as love, beauty, or nearness be drawn in pictures? The basis is a series of pictures of substantial things which the child knows, but a few strokes of the brush. The sun is drawn with four strokes and looks like a Greek letter. A man is drawn with two and looks like Shakespeare's 'forked radish.' It is one thing to draw a man or a horse or quite another to draw liberty, power or love.

What, for instance, did fear mean to them? We find a picture of a white-eyed heart! What terror inspired that—the tiger—the Mongol—or death? Did they love then? We see two pictures, one of a man who carries with him, and the other of a heart tightly grasped between two hands. What lover would reject that last?"

## Curious Family Word

Daughter Was Originally "Duhitar" Which Means a Milkmaid

Perhaps the most curious of the family words is daughter. In old English the "gh" was sounded rather like the "ch" in the Scottish loch. The root of the word is doch or duch; the "ter" signifies, just as it does in father and mater, a root of things. The word's history runs back through old English, German, Greek and Sanskrit to "duhitur." The "h" in this last word is a peculiar one, for it was pronounced almost like the "ch" just mentioned. But "duhitur" does not mean just a female child. It means a milkmaid. Our early ancestors were a farming people, and when a girl baby arrived they said, "Here's another little milkmaid."—London Tit-Bits.

The average weight of the contents of a freight car is about 40 tons.

## INSULL ARRESTED BY GREEK POLICE

Samuel Insull, former utilities magnate, who has been residing in Greece since the Insull Utilities Combine went under, has been arrested by Greek police, pending extradition proceedings. Insull is shown above as he dodged the cameras en route to his hotel in Athens.

## The Double Window Task

Every Man Has Become Martyr To This Custom

It is an odd trait in the average man that he will follow beaten tracks rather than disturb routine by making new paths. Now in the matter of storm windows man permits himself to become a martyr to custom and a slave to worry. Double windows are a night-mare to most all householders. The average of accidents to paternal-families in putting up storm shades must be very high indeed. Preceding every winter the dread task is faced with trepidation by the majority of men. It should be unnecessary. There ought to be a law against any householder risking their timid souls putting on the double windows. It should compel all builders to erect dwellings that do not need storm shades.

There doesn't need to be any genius or mechanical science, or excessive skill to erect homes without the requirement of this oppressive, dangerous, dog-gone job. Any elementary architect could design any home where the double windows can just click on inside! Why do they not do so as a mystery. Standard window frames actually invite indoor storm soaks fixtures—and they could then be more draft-resting and much more easily cleaned if there were replaceable windows clasped on quickly from inside any warm room in the home. Advocacy of a compulsory inside-double-window bylaw would elect any civic reformer. No merely humane scale liber to put on the crude double windows of today—and builders could even make it a recreation and a pleasure.—Brandon Sun.

"Mary," said the mistress to her new servant. "Always serve from the left and take the plates away from the right."

"Of course, madam," nodded Mary. "I'll do as you tell me, but it's the strangest superstition I ever heard of."

Thirty streets in Berlin are named Bismarck, and twenty-six Wilhelmstrasse.

"Poor George has been kicked by a horse."

"How dreadfully obsolete!"

## Facts About Early Indians

Among Northern B.C. Tribes Wife Was Head Of Family

In early times in northern British Columbia the wife was the head of the family among the Indian tribes. The wife claimed the children, and the husband was little more than a privileged visitor, marriages being banned within the tribes.

This is the contention of Prof. Hill-Tout, noted anthropologist of British Columbia, who has completed an intensive study of northern Indians.

Indians in the southern portions of this province, according to Prof. Hill-Tout, acknowledged the man as the head, with the mother of his children a visitor who returned to her tribe when the father died. Further south the family group was recognized.

Prof. Hill-Tout claims the Indians as they are known today represent the final offspring of the last of a series of migrations from eastern Asia. Six thousand years ago, he claims, Polynesians and Mongolians crossed to this continent—possibly in an age when Alaska and Siberia were joined by land.

The British Columbia Indians were among the latest arrivals, with general characteristics of Chinese or Japanese. They came at least 3,000 years ago, according to studies of a midden, the largest on this continent, uncovered some years ago near Vancouver.

## A Large Industry

It has been estimated that 140 tons of live bees have been shipped from California alone during the past year. When one stops to consider how many colonies of bees 140 tons would make and that this number is shipped from the one State of California, it is realized that beekeeping is a larger industry than most folks realize.

## Saskatchewan's 'Phone Lines

There were 6,835 pole miles and 48,624 wire miles of long distance telephone lines in Saskatchewan at the close of the last fiscal period, according to the most recent report of the department of telephones.

William Green has just completed his 60th year as town clerk at Bingley, England.

## Dismal Lakes—Coppermine

Part Of Canada's Fur North Shown On New Map

Coppermine River! What a gallery of mental pictures is conjured up by the name—of Samuel Hearne battling his way to the river in 1771; of Sir John Franklin and those who later sought for him; of lonely Coronation Gulf as described by explorers earlier in the present century; and now the vision of an increasing throng of prospectors searching not unsuccessfully up and down the river area for the copper-bearing rocks and for those containing more precious metals.

Coppermine River is 525 miles in length, flowing northerly and emptying into Coronation Gulf of the Arctic Ocean. It is a fast flowing river, running in a well defined valley with frequent rapids. This valley where it crosses the treeless Arctic plains forms a shelter for a stunted and brushy ever since Samuel Hearne searched for the source of the copper reported by the natives, practically every succeeding expedition has reported finding copper in some form in the vicinity of the river. During very recent years prospecting by means of aerial transportation has resulted in several finds of copper ore and work is being carried on now on prospects at Bonite Lake which lies between the river and Dismal Lakes. These lakes, which look like river expansions, drain through Kendall River into the Coppermine River.

Coppermine River, Dismal Lakes and a portion of Coronation Gulf are shown on a new map sheet of the National Topographic series published by the Topographical Survey, Department of the Interior at Ottawa, where it may be obtained at a nominal price. This map is on the scale of four miles to an inch and has been prepared from aeroplane photographs taken by the Royal Canadian Air Force. It is the most northerly map of this series to be published up to date, and adds considerably to the geographical knowledge of this far northern country.

The country mapped is part of the Arctic plains of Canada, which support a generous growth of ground birch, dwarf willows, mosses, lichens, heather and coarse grasses and sedges. These furnish sustenance to the caribou which migrate lightly during the summer season, but drift back to the wooded southern districts to spend the Arctic winters within their shelter. Musk-oxen are also found as well as wolves, Arctic hare, Richardson's ground squirrel, vole, fox, and occasionally bear. Along the coast the seal furnishes food and clothing to the Eskimos. All the common ducks and geese frequent the marshes and lakes while grouse, and ptarmigan are found throughout this part of the Territories.

This area is famed in the history of Arctic exploration as indicated by the names of some of the topographical features. Thus Bloody Falls on the Coppermine River were so named by Hearne on account of the savage massacre of a band of Eskimos at this place by the Indians who accompanied him from Hudson Bay. The name Hornby Hill recalls that hardy adventurer and explorer John Hornby, who spent many years in this country. Hanbury Koppe derives its name from David Hanbury, English explorer and sportsman who made a memorable trip through this region in 1902. Richardson River and Bay are named after Sir John Richardson who explored there in 1826. Kendall River was named after Lieut. Kendall, who accompanied Richardson, and Rae River after Dr. John Rae of the Hudson's Bay Company, to whose sterling efforts from 1848 to 1851 we are indebted for much of the information relative to this area. Dease River recalls the explorations and surveys of Peter Warren Dease who together with Thomas Simpson, both Hudson's Bay Company officials, worked in this region in 1837 and 1839.

At the mouth of Coppermine River is a small settlement including a Hudson's Bay Company's trading post, Anglican and Roman Catholic missions, and a Dominion Government radio telegraph station. At certain seasons considerable numbers of natives gather here to exchange their furs for trade goods.

One of the areas reported by the investigators of the Department of the Interior as suitable for reindeer grazing lies north and east of Great Bear Lake and extends to Coppermine River and Coronation Gulf. At the present time a herd to serve as the nucleus of future numbers is being driven eastwards from Alaska to their new home in the northern plains of Canada.

A sea elephant can eat 150 pounds of fish in a day and can go without eating for two months.

## Canada's Great Problem

Finding Export Market For Wheat At Fair Price

If there was any doubt heretofore as to Canada's greatest problem, publication of the Government's estimate of this year's wheat yield settled the matter. It is the sale of our wheat.

The Government statistical branch estimates that we have produced this year 465,000,000 bushels of wheat. The Government not long ago reported a carry-over from 1931 of 130,000,000 bushels of wheat. That is a total of 595,000,000 bushels, or practically 600,000,000, a tremendous volume.

We know that the acreage seed and feed requirements of the Dominion amount to 75,000,000 bushels while the average carry-over prior to 1928 was 70,000,000 bushels. That makes 145,000,000 bushels. But allowing good measure, let us say that Canada needs 200,000,000 for the year's use and as a reserve. We have left 400,000,000 bushels of which we must dispose this crop year, that is up to next July 31, if we are not to have another burdensome carry-over to depress prices when the 1933 crop comes on the market.

To get rid of 400,000,000 bushels of wheat we must export either as wheat or flour 1,100,000 bushels daily. That is double what we exported last year.

There are statesmen in this country who will worry themselves sick over the fate of a tinop factory, but they go joyously on their way when the problem of finding an export market for Canada's wheat, which will return to the grower a fair price, is broached. Until Canada wakes up and tackles this problem with a determination to find a solution, there can be little prosperity in this far Dominion.—Lethbridge Herald.

## Built Cabin On Border

Sheepherder Ate In Canada and Slept In United States

"Rawhide Jack" Moore, border old-timer, is dead. "Rawhide Jack" was, in turn, bull-whacker, sheepherder and saloon-keeper, and he had the unique distinction of being the only man known who could sleep in the United States and eat his breakfast in Canada without leaving his home.

His cabin was built on the international border, part in Canada and part in the United States and the Coultis, Alberta, folk boasted that "Rawhide Jack" slipped the finest flapjack in the northwest.

This famous western shack has stood there for 30 years or more. It was first built for use as a sheep camp bunkhouse, and out of deference to "Rawhide Jack" the authorities of the two countries have allowed it to stand without molestation.

Born in Texas, he came to Montana and Alberta years ago. He was of enormous size, tipping the scales at 300 pounds, and in his earlier days was famous and feared for his bouncer in a Montana saloon in the old pre-Volstead days "Rawhide Jack" could handle the toughest character with ease.

## An Amazing Road Structure

New Jersey To Have Elevated Highway Three Miles Long

An elevated super-highway, one of the world's most amazing road structures, is being rushed to completion between Jersey City and Newark, N.J.

Skipping across three miles of marshy meadows in Jersey, the giant structure, which is now beginning to look like some dream from the mind of Jules Verne, will permit the covering of distances in five minutes which now require anywhere from 20 minutes upward.

The concrete travelway, suspended from 100 to 150 feet in the air, crosses the Passaic and Hackensack Rivers, railroad tracks and yards and highways. Eighteen million cars yearly are expected to flow over the specially designed concrete pavement on the viaduct.

## Night Be Worse

No matter how hard up you may be, How dismal and hopeless your case is,

There's always someone around you can see With whom you'd not wish to change places.

"Do you find it more economical to do your own cooking?" "Certainly. Since I have been cooking my husband only eats half what he used to."

Reason constitutes the bond between God and ourselves.

Britain's merchant marine has a normal strength of 188,000 men.

## FANCIFUL FABLES

## More mothers each year.. check Colds

Being an external treatment, Vicks is especially appreciated by mothers because it avoids the constant "dosing" which so often disturbs children's delicate digestion.

### 2 WAYS at once!

More and more mothers every year turn to the double action of Vicks VapoRub in checking colds, coughs, sore throat and spasmodic croup.

Rubbed on throat and chest at bedtime, Vicks acts through the skin like a plaster. At the same time, its medicated vapors, released by the heat of the body, are inhaled directly to the air-passages.

This double action of Vicks breaks up congestion and eases breathing, thus preventing the night coughs which so often rob both mother and child of restful sleep.

### CHAPTER I. The Killers

Father Claverly, leaning against the rail of the "Midnight Sun" suddenly straightened up, stiff with shock; and stared incredulously at the six men.

For moments he could not believe he actually was witnessing a robbery. Here in this Canadian Northland where outlaws were rare and furtive, here on the mighty Mackenzie where river boats time and again carried unguarded cargoes of half a million in furs and gold, a brazen daylight lark upon a big steamer was simply unthinkable.

A few minutes ago the six men in a pair of birch-bark canoes had skirted out of the tributary river, the Big Alouka, and halted the steamer as though they were merely trappers or a trading party wanting passage up south. A ladder was innocently let down for them, and they had come aboard, taking a deplorable advantage of the friendly, accommodating spirit extended from man to man in this North country.

## CHRISTMAS in the OLD COUNTRY

All the joy of Christmas morning in the old home of childhood days can be yours this year at the lowest cost. Fares have been greatly reduced on Canadian Pacific Steamships.

Frequent Sailings Each Week.

## CANADIAN PACIFIC STEAMSHIPS

W. N. T. 1929

over those rifles, for the muzzles swerved aside from him.

"Don't shoot again," he bade quietly, as one with authority. "You have killed a man. You have murdered."

The dark-faced bandit who had fired the shot flinched before that steady accusing gaze, and turned his eyes away from Father Claverly's.

"I was compelled to kill him. He should not tried to interfere with us." Father Claverly scorned so flimsy a justification of a brutal killing. Turning away from the bandits, he faced the crowd. Steady, clear, his voice rose:

"Men! Don't stir! Don't make a shambles of this deck. There's nothing aboard this boat as precious as the lives that would be lost. Let them take what they want and go peacefully."

His appeal fell on deaf ears. A slow vengeful wrath was gathering. . . . Jimmy Montgomery, known and loved all along the Mackenzie, lay murdered there on the deck. . . . Those killers were going to pay for that barbarous crime.

The snarling oaths rose again; the muttering swelled audibly; hands crept down and closed upon belt-gun butts. . . .

It was the bandit leader who stopped the rush, who stopped it dead short at one stroke. Swinging his gun at a young schoolmistress, Margaret Fournier, one of the passengers, he ordered her, "Step up here, sister;

He Cocked His Weapon With an Audible Snick and Pointed it at Her Breast.

step up close," and when she obeyed him, wild-eyed with terror, he cocked his weapon with an audible snick and pointed it at her breast.

His voice rose so that the whole deck heard. "Now shoot! You can't get me afore I can get her! First move I see made with a gun, I'll give her what that gent there on the boards just got!"

Without turning or swerving his rifle from the girl, he bade two of his men:

"Andre, you and John go below. Git the dust. Sort out some furs, too, good furs, six or seven hundred pounds—marten, mink, dark fox. You know what's light and valuable."

The two bandits stepped down and seized one of the crew and made him take them down the companionway. Coming up presently, they lowered their booty into the two birchbark canoes that bobbed against the side of the steamer.

As though every man aboard real-

## PAIN relieved instantly

Aspirin will dispel any pain. No doubt about that. One tablet will prove it. Swallow it. The pain is gone. Relief is as simple as that. No harmful after-effects from Aspirin. It never depresses the heart, and you need never hesitate to make use of these tablets. So it is needless to suffer from headache, toothache or neuralgia. The pains of sciatica, lumbago, rheumatism or neuritis can be banished completely in a few moments. Periodical suffering of women can be soothed away; the discomfort of colds can be avoided.

Aspirin tablets have other important uses—all described by the proven directions in each box. Look for that name Aspirin on the box—every time you buy these tablets—and be safe. Don't accept substitutes. "Aspirin" is a trade-mark registered in Canada.

## You said it! it pays to "ROLL YOUR OWN" with..

Thousands of delighted smokers say it because they have proved it, time and time again.

You can roll at least 50 cigarettes with a 20c. package of Turret Fine Cut cigarette tobacco.

And every cigarette you roll will be to your liking. The more you roll, the more you'll enjoy them.

15c and 20c packages  
—also in 1/2 lb. vacuum tins

### Little Helps For This Week

"Be kindly affectioned one to another with brotherly love, in honor preferring one another."—Romans 12: 10.

"In her tongue is the law of kindness."—Proverbs 31:28.

Since trifles make the sum of human things,

And half our misery from our follies springs;

Since life's best joys consist in peace and ease,

And though but few can serve, yet all can please;

Oh, let the ungentle spirit learn from hence,

A small unkindness is a great offence.  
—Hannah More.

All usefulness and all comfort can be prevented by an unkind, crabbed temper of mind, a mind that can bear with no difference of opinion or temperament. A constant irritability, an unsatisfied temper, will more than neutralize all the good you can do, and render life anything but a blessing. You have not fulfilled every duty unless you have fulfilled that of being pleasant. Albert Barnes.

Peevish, pale, restless, and sickly children owe their condition to worms. Mother Graves' Worm Exterminator will relieve them and restore health.

China is buying more motor cars this year than last by nearly 15 per cent.

## WHEN 'RUN-DOWN'

Made In Canada

The sensible way—the doctor's way—of treating that sluggish, "run-down" condition is to use Phillips' Milk of Magnesia. Try it instead of something just to "move the bowels." See how much better you feel—and continue to feel for days after! The anti-acid action clears the system of all those poisons that cause headaches, fatigue, loss of appetite. Get the genuine; look for Phillips on the wrapper.

ALSO IN TABLET FORM: Phillips' Milk of Magnesia Tablets are now on sale at drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of genuine Phillips' Milk of Magnesia.

(To Be Continued.)

## THE CHINOOK ADVANCE

Published by Mrs. M. Nicholson every Thursday afternoon from The Advance Building, Main Street, Chinook, Alberta, and entered in the postoffice as second class mail matter.

All letters addressed to the editor for insertion in The Advance must be signed to show bona fides of the writer. Publication in all cases is subject to the judgment of the Publisher. We do not necessarily coincide with views expressed.

The subscription rates to The Advance are \$1.50 per annum in Canada and \$2.00 outside of Canada.

The transient advertising rates in The Advance are—display, 40c per inch for first week and 30c for each succeeding week, providing no change is made. For heavy composition an extra charge is made for first week. Reading notices, 10c per cent line. Legal advertising, 15c per cent line for first week and 10c for each succeeding week. Cards of thanks, \$1.00.

The Advance is a member of the Canadian Weekly Newspapers Association and the Alberta Weekly Newspapers Association, and observes the prices and conditions of these organizations.

### Small Advertisements

Advertisements under this heading are charged at the rate of 50c for 25 words or less per week, with 10c for each additional 5 words. Three weeks for the price of two.

### OBITUARY

#### JAMES PETTIGREW

Funeral services for James Pettigrew, 53 years of age, who died Tuesday night in a local hospital, will be held Thursday afternoon at 3:30 o'clock from the Foster and Foster funeral home, Rev. C. S. Pinder assisted by Rev. George Peacock officiating. Interment will follow in Burnsland Cemetery.

Mr. Pettigrew was born in Belfast, Ireland, and came to Alberta in 1909. He joined the 8th Field Ambulance in 1916 and served overseas until wounded. For many years he was active in the organization work of the Red Cross here and was widely known for his work among returned men.

He leaves his wife, Patricia, and three sons, William, Albert and Cecil, all at home.

Mr. Pettigrew was well known around Chinook, having farmed for some years two miles southwest of town.

WANTED—The news from every part of the Chinook district. Send it in.

Dated at Chinook, Alberta, this 17th day of November, 1932. Gustav Cook, applicant.

### Heard Around Town

The Ladies' Aid of the United Church will hold a bazaar and chicken supper, on Saturday Dec 3rd in the Banner Hardware. Super; One price for all; 25 cents.

The Ladies' Aid plan to put on a chicken supper after the bazaar on December 3rd, and would be very thankful to receive donations of chickens from out of town ladies. Will those ladies who are willing to donate kindly notify Mrs. Lee, president of the Aid, before Nov. 26th.

We regret to learn that H. G. McRea, publisher of "The Hanna Herald," after having been in the hospital at Hanna for the past month or more suffering with an abscess on the right arm, has, by order of his physicians, had the arm amputated. The operation was successful, and at time of writing Mr. McRea is doing as well as could be expected. We hope for him a speedy recovery.

Geo. E. Aitkin, partner in the Acadia Produce Company, and nephew, James Aitkin, left Monday night for their home at Vancouver.

Mrs. E. E. Jacques and infant son returned to their home on Monday afternoon.

Mrs. Gertrude Thompson and son William, who teaches south of Cereal, spent the week end in town.

Vincent Rideout, teacher at Stinson school, spent the week end with his parents, Mr. and Mrs. Rideout.

Mr. and Mrs. Dressel and family returned Sunday morning after spending a week at the home of their niece, Mrs. B. Byer, of Morrin, Alberta.

The annual meeting of Chinook Women's Institute will be held Wednesday, Dec. 7th, at 2:30 p.m., at the home of Mrs. Nelson Murray. Ladies! Note the time, 2:30 p.m.

The Ladies' Card Club met at the home of Mrs. Hurley. The prize winners were Miss Robinson and Mrs. Vanhook. Next week's meeting will be at the home of Mrs. Todd.

A broken axle piled up four freight cars loaded with coal just east of town on Sunday 1st. The wreck was cleaned up Monday.

N. D. Stewart left for Calgary Tuesday to attend the Wheat Pool Convention in that city.

The Young People's Society held their regular meeting on Wednesday evening at the church. After the business meeting a short devotional service was held led by Rev. Mr. Woollatt. Very amusing games and contests, along

Hitler Willing to Form Reich Government But On His Own Terms

(By Associated Press in Calgary Herald.)

Berlin, Nov. 23: Adolf Hitler, the Fascist leader, advised President Von Hindenburg on Wednesday that the formation of a government on a parliamentary basis was both impossible and undesirable and the cabinet crisis could be solved only with a cabinet directly responsible to the presidential authority.

Hitler told the president such a cabinet should be authorized if necessary to govern without parliament. The Nazi said he was willing to head such a government and place his movement at the disposal of the chief executive for this purpose.

Chinook and District Agricultural Society

The Annual General Meeting of the above society will be held in the Agricultural Hall on Saturday, November 26th, at 8 p.m.

2-31 B. G. Todd, Secretary.

Wasn't Nailing It On.

A woman was having the upper rooms of her house painted and she fancied the painter was slacking on the job.

"Painter, are you working?" she shouted from the foot of the stairs.

"Yes ma'am," came the reply.

"I can't hear you."

"Well, do yer think I'm putting it on with a hammer?"

She must be a sailor's daughter for she knows that buoys will be buoys
